A little knowledge is dangerous.

DANIEL SIMETI's life is simple: a boring day job and the spare time to indulge action-movie-fuelled daydreams - network gaming, martial arts and pistol shooting. But maybe it's time to grow up: he's met someone -

- LOUISE KEEHAN who's on a break from her university study and is waiting to catch up with her godfather, GEORGE MILLS. Mills, a security consultant, is in the custody of -

- LOREN MENCE who directs a billion-dollar money laundering operation. Mills was caught hacking Mence's computer network - and he's not cooperating with their internal investigation. Mence's lieutenant, SHANE TRIGGER, is tasked to bring in the goddaughter to help loosen their captive's tongue.

Picking up Louise - out with Daniel at the time - is easy enough. But when an accident allows them to escape Trigger and his team, they assume it's through sheer luck.

As Daniel tries to help in the name of chivalry and adventure - Trigger's team mistake his enthusiasm for proficiency. And when journalist 'SHEIK' SABARDIN answers Daniel's call for help, Trigger's assignment threatens to slide out of control: not only does their quarry have help from an action junkie and a journalist - they're told there's a disk from the hack-in that's unaccounted for.

They must assume the worst. They act accordingly.

All of Daniel's daydreams are about to come true; he's trained for it long enough.

But what chance does a rank amateur have against a team of fully trained and heavily armed killers?

When you've breathed action films long enough to believe you can do much better -

- your journalist friend knows how to handle automatic weapons -

- the woman you're falling in love with doesn't need your help to defend herself -

- anything's possible when you want to stay alive.

Anything.
